-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Following an unsuccessful attempt to contact Counsel for Applicant on 24 November 2004, Examiner submits the following written restriction requirement.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 21-39 & 104-114, drawn to measurement and analysis of data, classified in class 709, subclass 201.
 - II. Claims 40-99 & 115-119, drawn to storage of data, classified in class 709, subclass 213.
 - III. Claims 100-103, drawn to a network communication protocol, classified in class 709, subclass 237.
3. The inventions are distinct, each from the other because a method of measuring and analyzing information does not rely upon or require a method for storing or communicating information and visa-versa.
4. Inventions I, II & III are related as combination and subcombination(s). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a method of measuring and analyzing information does not rely upon or require a method for storing or communicating information and visa-versa. The subcombination(s) have separate utility such as a method for storing collected information or accessing data generally.

Art Unit: 2143

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper, especially in light of the undue burden the additional searching and examining places on the Examiner. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. As noted above, Examiner was unsuccessful in reaching Applicant's Attorney, thus, an election has not being made. Applicant is advised that a one month shortened statutory response time is allotted for election and failure to respond within that time period could result in abandonment of the application.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arrienne M. Lezak whose telephone number is (571)-272-3916. The examiner can normally be reached on M-F 8:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Wiley can be reached on (571)-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
